

ANTI-CORROSIIVE LARGE AXIAL FLOW PUMP

海水養殖專用防腐蝕大水量軸流幫浦

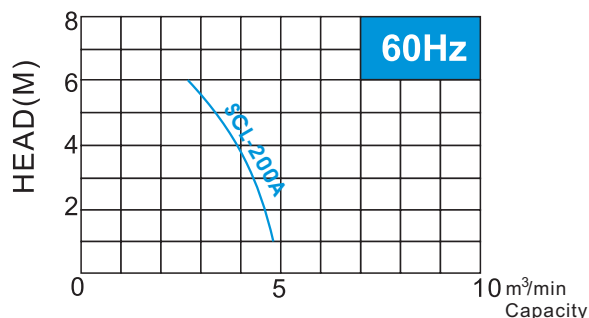

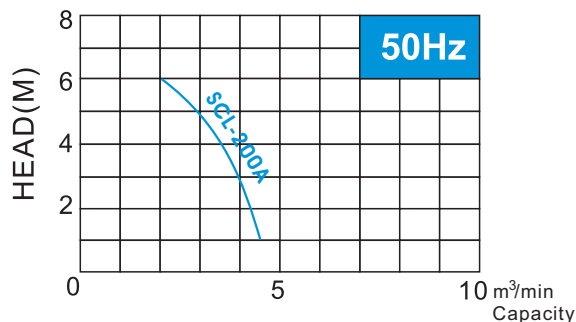

FEATURES

1. Axial flow pump is specially designed for a large volume water flow.
2. Easy operation and no high voltage device needed.
3. More economic and almost no vibration and noise.
4. Easy installation and dismantling, energy saving and low maintenance required.
5. The whole pump (except the outlet) is made of Bronze Copper and Stainless Steel SUS304, with excellent corrosion resistance.
6. The cable length : 10M.

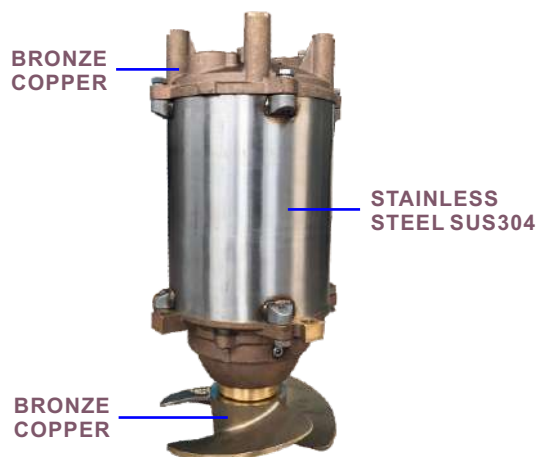

APPLICATIONS

1. Water pumping from streams, lakes, reservoirs, channel water and fishery pond.
2. For large volume of water intake and drainage in the aquaculture and agriculture field.
3. Flood control.

PERFORMANCE CURVE

SCL-200A
(7½ HP, 8")
